

DSO Non-Wind Generators - Energised

Associated Node	Voltage	Ref	Name	Type	MEC (MW)
-----------------	---------	-----	------	------	----------

DSO Energised

Drybridge	110 kV	DG314	Knockharley Landfill (1)	LFG	1.425
Drybridge	110 kV	DG230	Meath Waste-Energy (1)	LFG	17.000
Wexford	110 kV	DG325	Ballyshannon Farms (1)	CHP	0.100

Total Energised DSO **18.525**

TOTAL ENERGISED:	18.525
-------------------------	---------------

Definition:

DSO: A generator is considered Energised when a generator turbine has electrical connection to the network i.e. construction complete, however, is not currently permitted to export.

Note:

Maximum Export Capacity (MEC) is by definition the contracted maximum export value (in MW) of an entire generation station in accordance with the generator's connection agreement. However, to illustrate the capacity of each individual unit within a generation station the MEC is broken down and stated on a per unit basis.

Information on distribution generators is based on data supplied by the Distribution System Operator, (DSO).
