

Draft Transmission Development Plan 2010 For Public Consultation

EirGrid - in accordance with its responsibilities as Transmission System Operator (TSO) to develop a safe, reliable, and economic transmission network - has prepared a draft Transmission Development Plan 2010.

The draft Development Plan describes the TSO's development planning process, it discusses the drivers and assumptions underlying the plan, and it outlines the TSO's plans for transmission network development over the next five years (including projects under construction) and indicates where further potential development is likely to be required.

In accordance with Regulation 8(6) of Statutory Instrument 445 (2000) the draft plan is being issued for public consultation.

[Click here to read the draft plan](#)

It is not intended that this consultation process would interfere with the public planning approvals process, which is the proper vehicle for public comment on individual transmission development projects.

We in EirGrid are now inviting comment on this draft Transmission Development Plan. We would ask that you complete your response by **Friday 14th January 2011**. Contact details are given below. A timely response will allow us to properly consider your comments and suggestions, before submitting the final plan to Commission for Energy Regulation for approval.

We look forward to your comments. You should note that these may be made public.

Please respond in writing by Friday 14th January 2011 to
