

CONTENTS	PAGE
FOREWORD	
SUMMARY	
1 INTRODUCTION	1-1
1.1 Outline Of The Transmission Forecast Statement	1-1
1.2 Improvements In This Transmission Forecast Statement	1-2
1.3 Treatment Of Single Energy Market	1-3
1.4 Data Management	1-4
1.5 Publication	1-5
2 THE ELECTRICITY TRANSMISSION NETWORK	2-1
2.1 Overview Of The Electricity Transmission Network	2-1
2.2 Existing Connections With Northern Ireland	2-2
2.3 Plans For Transmission System Development	2-3
2.4 Connection Of New Generation Stations	2-5
2.5 Connection Of New Interface Stations	2-6
2.6 Detailed Network Information	2-7
3 DEMAND	3-1
3.1 Basis Of Demand Forecasts	3-1
3.2 Forecasts Of Transmission Peaks	3-2
3.3 Comparison With Previous Demand Forecast	3-3
3.4 Forecast Demand At Transmission Interface Stations	3-3
3.5 Demand Profiles	3-4
4 GENERATION	4-1
4.1 Existing and Planned Grid-Connected Generation	4-1
4.2 Additional Generation Requirements For 2012 Studies	4-2
4.3 Generation Unit Retirements	4-2
4.4 Embedded Generation	4-3
4.5 Wind Generation	4-3
5 TRANSMISSION SYSTEM PERFORMANCE	5-1
5.1 Forecast Power Flows	5-1
5.2 Compliance With Planning Standards	5-2
5.3 Short Circuit Currents	5-3

6	OVERVIEW OF TRANSMISSION SYSTEM CAPABILITY ANALYSES	6-1
6.1	Transfer Capability Analyses For New Generation	6-1
6.2	Transfer Capability Analyses For New Demand	6-3
6.3	Transfer Capability Analyses For Transfers With Northern Ireland / Single Electricity Market	6-5
6.4	Transfer Capability Analyses For Ireland-Great Britain Transfers	6-6
6.5	Factors Impacting On Results	6-6
7	NETWORK CAPABILITY FOR NEW GENERATION	7-1
7.1	ITC Results For Large Generation At Selected 220 kV Stations	7-1
7.2	ITC Results For Smaller Generation At Selected 110 kV Stations	7-4
7.3	Opportunity For New Generation	7-7
7.4	Impact Of Changes Since The Data Freeze	7-9
7.5	How To Use The Information For Generation	7-10
8	NETWORK CAPABILITY FOR NEW DEMAND	8-1
8.1	Incremental Transfer Capability Results For New Demand	8-1
8.2	Opportunities For New Demand	8-3
8.3	Impact Of Changes Since The Data Freeze	8-4
8.4	How To Use The Information For Demand	8-4
9	NETWORK CAPABILITY FOR TRANSFERS WITH NORTHERN IRELAND / SINGLE ELECTRICITY MARKET	9-1
9.1	Capability Results For Transfers To and From Northern Ireland	9-1
9.2	Opportunities For Transfers To and From Northern Ireland	9-2
9.3	Impact Of Changes Since The Data Freeze	9-3
10	NETWORK CAPABILITY FOR INTERCONNECTION WITH GREAT BRITAIN	10-1
10.1	Transfer Capability Results For Interconnection With Great Britain	10-2
10.2	Suitability Of Locations For Connection Of Ireland-Great Britain Interconnector	10-4
10.3	Impact Of Changes Since The Data Freeze	10-4

APPENDICES

A	MAPS AND SCHEMATIC DIAGRAMS	A-1
A.1	Network Maps	A-2
A.2	Short Bus Codes	A-3
A.3	Schematic Network Diagrams	A-8
B	NETWORK CHARACTERISTICS	B-1
B.1	Characteristics Of The Existing Network	B-3
B.2	Changes In Network Characteristics	B-15
C	DEMAND FORECASTS AT INDIVIDUAL TRANSMISSION INTERFACE STATIONS	C-1
D	GENERATION CAPACITY AND DISPATCH DETAILS	D-1
D.1	Generation Connected To The Transmission System	D-1
D.2	Wind Generation Connected To The Distribution System	D-6
D.3	Generation Dispatch Details	D-10
E	SHORT CIRCUIT CURRENTS	E-1
E.1	Background	E-1
E.2	Analysis	E-2
E.3	Results	E-3
F	ADDITIONAL INFORMATION ON OPPORTUNITIES	F-1
G	STUDY METHODS	G-1
G.1	Incremental Transfer Capability Studies For Generation	G-1
G.2	Incremental Transfer Capability Studies For Demand	G-6
G.3	Capability Studies For Transfers To and From Northern Ireland	G-9
G.4	Capability Studies For Transfers With Great Britain	G-10
H	ABBREVIATIONS AND GLOSSARY	H-1
H.1	Abbreviations	H-1
H.2	Glossary	H-3
I	REFERENCES	I-1
J	POWER FLOW DIAGRAMS	J-1
J.1	Guide To The Power Flow Diagrams	J-1
K	SIZE A3 GEOGRAPHICAL MAPS	K-1

TABLES

Table S-1	Forecast of Peak Transmission Demand	S-3
Table S-2	Summary of Planned Generators with Signed Connection Agreements at End of December 2005	S-4
Table 2-1	Total Length of Existing Grid Circuits at December 2005	2-1
Table 2-2	Total Grid Transformer MVA Capacity	2-2
Table 2-3	Total Reactive Compensation	2-2
Table 2-4	Planned Connection Methods of Future Generators	2-6
Table 2-5	Planned 110 kV Stations	2-6
Table 3-1	Transmission Demand Forecast, MW	3-2
Table 3-2	Comparison of Peak Demand Forecast with Previous Forecast Statement, MW	3-3
Table 4-1	Planned Grid-Connected Generation	4-1
Table 4-2	Existing Embedded Generation at December 2005	4-3
Table 4-3	Existing and Committed Wind Capacity Totals, MW	4-4
Table 5-1	Standard Equipment Rating and Maximum Design Short Circuit Currents	5-4
Table 6-1	Existing Generation Blocks	6-2
Table 7-1	Incremental Transfer Capability for Generation at 220 kV Stations in 2007	7-3
Table 7-2	Incremental Transfer Capability for Generation at 220 kV Stations in 2009	7-3
Table 7-3	Incremental Transfer Capability for Generation at 220 kV Stations in 2012	7-4
Table 7-4	Capability for New Generation at 110 kV Stations, MW	7-6
Table 8-1	Capability for Additional Demand at 110 kV Stations, MW	8-2
Table 9-1	Total Transfer Capability for Power Transfers from Northern Ireland	9-2
Table 9-2	Total Transfer Capability for Power Transfers to Northern Ireland	9-2
Table 10-1	Total Transfer Capability for Imports from Great Britain in 2009	10-2
Table 10-2	Total Transfer Capability for Imports from Great Britain in 2012	10-2
Table 10-3	Total Transfer Capability for Exports to Great Britain in 2009	10-3
Table 10-4	Total Transfer Capability for Exports to Great Britain in 2012	10-3
Table A-1	Short Bus Codes	A-4
Table A-2	Schematic Legend	A-6
Table B-1	Nominal and Reference Voltage Levels	B-2
Table B-2	Characteristics of Existing 400 kV Lines	B-3
Table B-3	Characteristics of Existing Interconnector 275 kV Lines	B-3
Table B-4	Characteristics of Existing 220 kV Lines and Cables	B-4
Table B-5	Characteristics of Existing 110 kV Lines and Cables	B-6

Table B-6	Characteristics of Existing 400/220 kV Grid Transformers	B-11
Table B-7	Characteristics of Existing 275/220 kV Grid Transformers	B-11
Table B-8	Characteristics of Existing 220/110 kV Grid Transformers	B-12
Table B-9	Characteristics of Existing Power Flow Controller	B-13
Table B-10	Characteristics of Existing Reactive Compensation	B-13
Table B-11	Changes in Circuit Characteristics Expected in 2006	B-15
Table B-12	Changes in Circuit Characteristics Expected in 2007	B-17
Table B-13	Changes in Circuit Characteristics Expected in 2008	B-19
Table B-14	Changes in Circuit Characteristics Expected in 2009	B-19
Table B-15	Changes in Circuit Characteristics Expected in 2010	B-20
Table B-16	Changes in Circuit Characteristics Expected in 2011	B-20
Table B-17	Changes in Circuit Characteristics Expected in 2012	B-21
Table B-18	Characteristics of Transformers Expected in 2006	B-21
Table B-19	Characteristics of Transformers Expected in 2008	B-21
Table B-20	Characteristics of Transformers Expected in 2009	B-22
Table B-21	Characteristics of Transformers Expected in 2010	B-22
Table B-22	Characteristics of Transformers Expected in 2012	B-23
Table C-1	Demand Forecast at Time of Winter Peak	C-1
Table C-2	Demand Forecast at Time of Summer Peak	C-5
Table C-3	Demand Forecast at Time of Summer Valley	C-8
Table D-1	Maximum Export Capacities of Existing and Committed Transmission- Connected Generation	D-2
Table D-2	Maximum Continuous Rating of Existing and Committed Transmission- Connected Generation	D-4
Table D-3	Distribution-Connected Wind Farm Capacity at Year End	D-6
Table D-4	Base Case Generation Dispatches	D-11
Table E-1	Short Circuit Current Levels – Standard Equipment Rating	E-2
Table E-2	Short Circuit Currents for Maximum and Minimum System Demand in 2007	E-3
Table E-3	Short Circuit Currents for Maximum and Minimum System Demand in 2009	E-9
Table E-4	Short Circuit Currents for Maximum and Minimum System Demand in 2012	E-15
Table F-1	List of Potential Network Constraints for which the TSO has initiated Projects	F-2
Table F-2	List of Potential Network Constraints for which the TSO has Plans in Place	F-2
Table F-3	List of Potential Network Constraints requiring Further Investigation	F-3
Table G-1	Existing Generation Blocks	G-4
